

Mhaithan Caliuag

Front-End Developer & UI Designer

Open to Full-Time Roles & Internships

Hi, I'm Mhaithan Caliuag I'm a Front-End Developer & UI/UX Designer

Passionate developer specializing in building responsive, high-performance web applications, modern design systems, and seamless user experiences. Ready to contribute clean code, fast learning, and strong design thinking to your engineering team.

Schedule an Interview

CORE TECHNICAL STACK & TOOLS:

JavaScript (ES6+) HTML5 & CSS3 React Fundamentals Figma UI/UX Git & GitHub

Responsive Design

Scroll down to view featured work

FEATURED WORK

Projects & Case Studies

Demonstrating practical frontend engineering, responsive design, and UI/UX systems.

Creative Studio

HTML5 · CSS Grid · JS

Modern Editorial Web Application

Developed a high-performance, responsive agency platform with modular typography, smooth scroll animations, and cross-browser responsiveness.

Mobile-First · Semantic Markup · WCAG Accessible

E-commerce & Analytics

React · Data Viz · Flexbox

SaaS Product Dashboard

Interactive dashboard interface featuring clean component hierarchies, responsive analytics charts, dark mode UI, and structured state data.

Component Architecture · State Handling · Interactive Charts

Personal Portfolio System

CSS Architecture · Figma · SEO

Developer Showcase Platform

Created an architectural portfolio template engineered for speed, clean semantic code, optimized asset loading, and high Lighthouse scores.

99+ Performance · Design System · SEO Optimized

Event Pass & Ticketing

Mobile UI · Touch UX · API

Mobile Web Experience

Designed and built a mobile-first digital ticketing flow with interactive passes, QR code rendering, and tactile touch interactions.

Touch Gestures · Fast Rendering · PWA Ready

CANDIDATE PROFILE

Why I'm Ready to Add Immediate Value

A passionate front-end developer who bridges the gap between design and production code.

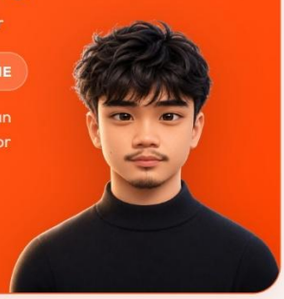

Mhaithan Caliuag

Front-End Developer & UI Designer

★ READY TO CONTRIBUTE DAY ONE

Brings strong attention to detail, clean code structure, and deep empathy for user experience.

Contact Candidate →

What I bring to your team

1. Clean, Maintainable Code
2. Pixel-Perfect UI Delivery
3. Rapid Learning & Execution

100%

Reliability & Focus

- ✓ Fast Onboarding & Git Flow
- ✓ Component-Driven Development
- ✓ Cross-Browser & Accessibility

Clear & Proactive Communication

Active in code reviews, daily standups, and documentation to keep team workflows completely frictionless.

Driven

Work Ethic & Growth Mindset

★★★★★

Production Ready

Build & ship responsive interfaces with precision

Translating complex Figma designs into responsive, clean code with modular CSS, semantic tags, and performance audits.

TECHNICAL COMPETENCIES

Skills that elevate your software products.

Combining modern frontend development practices with thoughtful UI/UX design to build scalable, user-centric web applications.

Discuss Technical Fit

JavaScript ES6+ | HTML5 & CSS3 | React | Figma | Git / GitHub | Responsive Web | UI Systems | REST APIs

Frontend Engineering & Modern JS

Writing clean, modular, and maintainable JavaScript (ES6+), semantic HTML5, and responsive CSS (Flexbox, Grid, custom properties) across modern browsers.

Responsive UI & Component Systems

Building reusable, accessible UI component libraries with pixel-perfect attention to hierarchy, typography, touch targets, and motion.

Figma to Production Code Implementation

Accurately transforming Figma design tokens, auto-layout components, and interactive prototypes into lightweight, production-ready frontend code.

Performance Optimization & Web Vitals

Optimizing asset delivery, critical rendering path, responsive images, and DOM structures to achieve fast load times and optimal Core Web Vitals.

Version Control, Automation & Agile Teamwork

Comfortable working with Git workflows (branches, PRs, code reviews), task automation (Make/Zapier), and agile collaborative sprints.

BACKGROUND & TRACK RECORD

Experience & Education

Hands-on technical background, student leadership, and continuous skill building.

Front-End Web Developer & UI Designer

2024 — Present

Independent Projects & Contract Work · Baliwag, Bulacan

Designed and deployed modern, mobile-responsive web applications for student initiatives, local creators, and portfolio projects. Created modular CSS architectures and automated workflows connecting forms, spreadsheets, and APIs.

- Engineered 4+ responsive web concept applications with clean semantic markup and modern JavaScript.
- Collaborated with stakeholders to identify pain points, delivering intuitive digital experiences on schedule.
- Maintained 100% adherence to mobile-first responsive principles across tablet and smartphone devices.

Digital Design & Technology Lead

2023 — Present

College Initiatives & Creative Projects

Led the visual identity and digital assets for college platforms, event campaigns, and promotional websites. Standardized design tokens and assets in Figma to streamline collaboration.

- Built reusable visual templates and brand starter kits utilized across multiple digital touchpoints.
- Mentored peers on Git version control basics, responsive design techniques, and modern Figma workflows.

Bachelor of Science Student (IT / Computer Studies)

Expected 2026 / 2027

Higher Education · Bulacan, Philippines

Pursuing rigorous coursework in web development, database systems, software engineering fundamentals, human-computer interaction (HCI), and object-oriented programming.

- Consistent high academic standing with active involvement in practical software development workshops.
- Focused on mastering modern frontend frameworks, cloud deployment, and system automation.

ENGINEERING WORKFLOW

How I Approach Development & Problem Solving

A disciplined process that delivers clean, reliable, and testable results every time.

01

Analyze & Prototype

Carefully review requirements, design system constraints, and edge cases. Prototype component structures in Figma or wireframes before writing code.

02

Build & Refactor

Develop using clean, semantic, and modular frontend standards. Keep CSS maintainable, JavaScript readable, and component interfaces well-documented.

03

Test, Audit & Ship

Verify responsiveness across viewport sizes, test browser compatibility, run Lighthouse accessibility audits, and ship via Git version control.

PEER & MENTOR FEEDBACK

What Collaborators Say About Working With Me

★★★★★

"Mhaithan brings incredible energy, speed, and precision to web development. He turns complex wireframes into polished, responsive code with zero friction."

EW **Ethan Walker**
Senior Engineering Lead

★★★★★

"A rare talent who excels at both UI design and frontend implementation. He asks the right questions early, takes feedback constructively, and ships fast."

LB **Lucas Bennett**
Product & Scrum Manager

★★★★★

"His dedication to clean code, responsive layouts, and performance optimization immediately stood out. Any engineering team would be lucky to have him."

MB **Madison Brooks**
Creative Director

★★★★★

"Proactive, communicative, and dependable. Mhaithan delivered our digital campaign portal ahead of schedule with flawless cross-device responsiveness."

NR **Noah Richardson**
Technical Consultant

★★★★★

"Exceptional attention to detail. He thoroughly tested every UI component across iOS, Android, and desktop browsers, ensuring consistent user experience."

HC **Harper Collins**
Frontend Architect

★★★★★

"Mhaithan is a self-starter with an unmatched work ethic. He masters new tools in days and delivers clean, maintainable code on every sprint."

AT **Avery Thompson**
Design Systems Lead

HIRING FAQS

Questions Recruiters & Hiring Managers Ask

- What types of roles are you currently looking for? +
- What is your current availability and timeline to start? +
- What sets you apart from other junior candidates? +
- How do you collaborate within an engineering team? +
- Are you open to learning new frameworks or backend technologies? +
- How can we schedule an interview with you? +
